- SDLC Support Services

PRODUCTS

Our unique products support semantic interoperability with information models from various standards organizations. We have assembled all your data models into one product suite.

FHIMview

Supports semantic interoperability providing the HIT community with data elements from the Federal Health Information Model (FHIM).

FHIRview

Harnesses the HL7 Fast Healthcare Interoperability Resources (FHIR) and supports semantic interoperability. Explore FHIR resources, elements, and datatypes.

NIEMview

Provides a 'big picture' view of the National Information Exchange Model (NIEM) giving users the ability to explore the inheritance of various domain elements and classes of the NIEM Core.

VSACview

Designed to help users navigate through a VSAC ECQM mind map. Users also have direct access to CCDA R2 and R2.1.
